**1-13 July, 2018 Summer School on Paris -Saclay Campus**

## Engineering Summer School on Artificial Intelligence

CentraleSupélec is launching an engineering summer school on Artificial Intelligence and Machine Learning. This programme is intended for students enrolled in at least 2nd year of Bachelor in Engineering or Science who are interested in studying in France.

The summer school will run from Monday 2 July to Friday 13 July 2018. The two-week intensive course, fully taught in English, includes 41 hours of lectures and tutorial sessions enabling students to broaden their knowledge through simulations and practical assignments. In addition to the training activities, the summer school will include cultural activities, Paris sightseeing tour, a company visit, a welcome lunch and a farewell ceremony.

**Booking is now open!**
